MTWorkflows™

Introducing **MTWorkflows**™ - the ultimate TMC automation tool that streamlines your daily processes and enhances client communication to improve your overall productivity, efficiency and customer service.

Gone are the days of tedious, laborious manual tasks that take up valuable time and resources. MTWorkflows automates simple TMC processes, whether within or outside the GDS, to produce the best possible results.

With its user-friendly interface, creating a workflow of predefined processes is quick and easy. The resulting flow chart visually represents the workflow, making it easy to understand and customise to your specific needs.

Improved Customer Experience:
MTWorkflows enables you to provide a faster, more efficient and personalised service to your clients. This means you can respond to their needs more quickly and with greater accuracy.

Reduced Manual Errors:
Automate the booking process for flights, hotels, and car rentals, eliminating the need for repetitive manual data entry and risk of manual errors.

Increased Productivity:
By automating time-consuming, repetitive tasks, we help you save time and increase your productivity, so you can focus on more important tasks requiring your expertise and attention.

Customisable Workflows:
Easily set up workflows tailored to your needs, such as custom approval processes. Create optimised workflows for your requirements, rather than use a one-size-fits-all solution.

IROP and flight monitoring:
Use MTWorkflows to monitor flights and quickly respond to IROPs (Irregular Operations) with customised automated workflows.

Deliver on Quality:
Enhance the quality of your travel services by automating QC checks and audits, allowing for continuous improvement and refinement.
